

UX Content Audit Report

Project: UX Content Audit of the Core User Journeys

Start Date: June 17, 2024 | **End Date:** August 5, 2024

Introduction

Project Overview:

This report summarizes the findings from a UX content audit conducted on seven core user journeys of the Angel One Android app. The audit aimed to evaluate the quality and effectiveness of the content in these journeys and identify areas for improvement.

Core Journey	Number of Screens	Number of Issues Identified
Home	38	232
Portfolio	33	72
Watchlist	9	69
Orders	8	25
Account	26	71
KYC	43	30
Payments	12	38
Total	169	537

Table 1. Number of issues discovered in the audit

Objective:

The main objective of this content audit was to assess the hygiene level issues in UX content across the Home, Orders, Watchlist, Portfolio, Account, KYC, and Payments journeys.

Scope:

The audit covered the L0 and L1 textual elements within these user journeys, including microcopy, instructions, labels, headings, etc.

The number of screens audited is 169. A total of 537 issues were discovered in these screens.

Methods

Audit Process:

Review all content elements within the specified user journeys. Content was evaluated based on readability, clarity, consistency, and adherence to grammatical and spelling standards.

Findings

Total number of issues identified was 537. Recommendations were made to address all identified issues.

Core Journey	Number of Issues Identified
Home	232

Portfolio	72
Watchlist	69
Orders	25
Account	71
KYC	30
Payments	38
Total	537

Issues identified and rectified:

1. **Poor Readability and Clarity:** Some content elements were difficult to understand due to complex language, long sentences, and jargon.
2. **Misalignment with User Journey Steps:** Some content was not aligned with the specific steps in the user journey, causing a disconnect between actions and the information provided.
3. **Basic Spelling, Language, and Grammar Issues:** There were multiple spelling errors, improper grammar, and awkward phrasing.
4. **Inconsistency in Formats:** There were inconsistencies in formatting, particularly with dates, time suffixes, and headings, which created a disjointed user experience.

Next steps:

- Timeline for implementing changes from Tech
- Attach more details to the report – inventory and specifics on the issues
